

## Recyclables

Did you know you can dispose of a whole range of recyclable goods at transfer stations free of charge? We want to support our community to recycle more and accept the following without cost.

**E-Waste** Any items with a battery or cord including computers, mobile phones, microwaves and hair dryers.

**Metal** White goods, air conditioners and scrap metal such as roofing and gutters. Conditions apply.

**Glass** Brown, green and white bottles and jars (food and drink only). No windows.

**Plastic** Bottles and containers (recycling codes 1 to 2 accepted with lids removed).

**Aluminium** Cans and foils free from contamination.

**Paper and Cardboard** Household paper such as newspaper, cardboard, boxes and milk cartons.

**Automotive Oils and Batteries** Motor oils up to 20 litres and car/truck batteries only. No engine coolant, flammable liquids and cooking waste oils.

## Separating Recyclables Reduces Costs

Most recyclables can be deposited free of charge at our transfer stations (except green organics). Your costs can be reduced significantly by separating your recyclables from other waste - place your recyclables in individual containers separate from your other waste (or clearly separate them in your load). This makes it much easier for the transfer station staff to assess your load and charge only for your waste.

## Locations
